

INDEX TO VOLUME XII.

A

- ABBoud, M. A. (and I. A. Sabri, M. Ali) : Dysentery in infancy, 225
Absence of the pectoral muscles, congenital (E. D. Irvine and J. B. Tilley), 123
Acute myeloid leukaemia in one of identical twins (C. E. Kellett), 239
African children, pellagra in (H. C. Trowell), 193
ALI, M. (and I. A. Sabri, M. A. Abboud) : Dysentery in infancy, 225
Anaemia of infancy and childhood, studies in, Part XI (L. G. Parsons, Evelyn M. Hickmans and Ethel Finch), 369
Anaemia of late infancy, the iron-deficiency (H. W. Fullerton), 91
Angiomatosis clinically resembling a lipoid granulomatosis (J. H. Ebbs), 265
Arteriosus communis with microphthalmos, orbital cyst and polydactyly, persistent truncus (H. A. Harris and G. C. Thomson), 59
Arthritis in childhood, the prognosis in rheumatoid (T. Colver), 253
Atrophic cirrhosis of the liver following icterus gravis neonatorum (Frances Braid and J. H. Ebbs), 389
Auriculo-ventricular conduction time in children with rheumatic fever, variations in the first heart sound and the (J. D. Keith), 217

B

- BIEMOND, A. (and S. Van Creveld) : Nuclear jaundice in neonatal (umbilical) sepsis with jaundice, 173
Bile ducts in a child who lived for three years and three months, congenital obliteration of the (Constance Finlayson), 153
BLACK, W. C. : Continuous intravenous drip in infants and children, 381
Boiling on the nutritive value of milk, the effect of (S. Graham and N. Morris), 169
BRAID, FRANCES (with pathological report by J. H. Ebbs) : Atrophic cirrhosis of the liver following icterus gravis neonatorum, 389
BRATHWAITE, J. V. C. : The treatment of infantile pyloric stenosis by eumydrine, 262
Broken home, delinquency in relation to the (R. G. Gordon), 111

C

- CAMPBELL, S. : The demonstration of the tubercle bacillus in the pulmonary tuberculosis of childhood, 321
CARDNO, J. A. : Three cases of non-bacterial meningitis, 185
Cerebral sclerosis of infants, familial progressive diffuse (Dorothy S. Russell and K. H. Tallerman), 71
Cerebral sinus thrombosis in children (J. H. Ebbs), 133
Cerebral tumours in children : pathological report (R. O. Stern), 291
Child Health, Diploma of, 264
Choroid plexus in an infant, papilloma of the (J. H. Ebbs), 403
Chronic miliary tuberculosis in children (R. H. Fish), 1
Cirrhosis of the liver following icterus gravis neonatorum, atrophic (Frances Braid and J. H. Ebbs), 389
Clinical survey of 178 cases of pink disease (J. C. Spence), 265
COLVER, T. : The prognosis in rheumatoid arthritis in childhood, 253
Condensed milk for habitual vomiting in infancy (H. L. Walker), 262
Congenital absence of pectoral muscles (E. D. Irvine and J. B. Tilley), 123
Congenital obliteration of the bile ducts in a child who lived for three years and three months (Constance Finlayson), 153
Continuous intravenous drip in infants and children (W. C. Black), 381
COOPER, E. D. : Studies in gastro-enteritis, 339
CREVELD, S. VAN (and A. Biemond) : Nuclear jaundice in neonatal (umbilical) sepsis with jaundice, 173

D

- Deficiency in infancy : Vitamin B₁₂, a critical review (M. R. Price), 213
Delinquency in relation to the broken home (R. G. Gordon), 111
Demonstration of the tubercle bacillus in the pulmonary tuberculosis of childhood (S. Campbell), 321
Diploma of Child Health, 264
Drip, in infants and children, continuous intravenous (W. C. Black), 381
Dysentery in infancy (I. A. Sabri, M. A. Abboud and M. Ali), 225

E

- EBBS, J. H. : Cerebral sinus thrombosis in children, 133—Angiomatosis clinically resembling a lipoid granulomatosis, 265—Papilloma of the choroid plexus in an infant, 403—(and Frances Braid) : Atrophic cirrhosis of the liver following icterus gravis neonatorum : pathological report, 389
Erythema marginatum (rheumaticum) (C. B. Perry), 233
Eumydrine, the treatment of infantile pyloric stenosis by (J. V. C. Braithwaite), 262
EVANS, P. R. : Generalized cutaneous vaccinia, 333
Expansion of the lungs in an infant, abnormal (B. Morgan), 67

F

- Familial progressive diffuse cerebral sclerosis of infants (Dorothy S. Russell and K. H. Tallerman), 71
FINCH, ETHEL (and L. G. Parsons, Evelyn M. Hickmans) : Studies in anaemia of infancy and childhood—Part XI, 369
FINDLAY, LEONARD : Hypertrophic pyloric stenosis without symptoms, 399
FINLAYSON, CONSTANCE : Congenital obliteration of the bile ducts in a child who lived for three years and three months, 153
FISH, R. H. : Chronic miliary tuberculosis in children, 1
Food requirements, nutritive (E. Gorter), 261
FORD, F. J. : Von Gierke's disease in several members of one family, 263
Fractures in children, plasma phosphatase and phosphorus during the healing of (Olive D. Peden), 87
FULLERTON, H. W. : The iron-deficiency anaemia of late infancy, 91

G

- Gastro-enteritis, studies in (E. D. Cooper), 339
Generalized cutaneous vaccinia (P. R. Evans), 333
Gierke's (von) disease in several members of one family (F. J. Ford), 263
GORDON, R. G. : Delinquency, in relation to the broken home, 111
GORTER, E. : Nutritive food requirements, 261
GRAHAM, S. : The effect of boiling on the nutritive value of milk, 169
Granulomatosis, angiomatosis clinically resembling a lipoid (J. H. Ebbs), 265

H

- Habitual vomiting in infancy, condensed milk for (H. L. Wallace), 262
Haemophilia, new treatment of (A. E. Naish), 264
HARRIS, H. A. (and G. C. Thomson) : Persistent truncus arteriosus communis with microphthalmos, orbital cyst and polydactyly, 59
Health, Diploma of Child, 264
Health of 1,530 pre-school children, an investigation into the (P. Henderson), 157
Healing of fractures in children, plasma phosphatase and phosphorus during the (Olive D. Peden), 87
Heart sound and the auriculo-ventricular conduction time in children with rheumatic fever, variations in the first (J. D. Keith), 217
HENDERSON, P. : An investigation into the health of 1,530 pre-school children, 157
HICKMANS, EVELYN M. (and L. G. Parsons, Ethel Finch) : Studies of anaemia in infancy and childhood, Part XI, 369
Home, delinquency in relation to the broken (R. G. Gordon), 111
HUTCHISON, J. H. : Observation on the retention of iron, 265—Studies on the retention of iron in childhood, 305
Hypertrophic pyloric stenosis without symptom (Leonard Findlay), 399

I

- Icterus gravis neonatorum, atrophic cirrhosis of the liver following (Frances Braid and J. H. Ebbs), 389
Illness of infection of measles with special reference to the determination of the incubation period and the possibility of latent immunity (R. E. Smith), 265
Infancy, the iron-deficiency anaemia of late (H. W. Fullerton), 91
Infant, abnormal expansion of the lungs in an (B. Morgan), 67
Infants, familial progressive diffuse cerebral sclerosis of (Dorothy S. Russell and K. H. Tallerman), 71
Influenzal meningitis with recovery, two cases of (P. Williams and K. H. Tallerman), 263
Intravenous drip in infants and children, continuous (W. C. Black), 381

- Investigation into the health of 1,530 pre-school children, an (P. Henderson), 157
 Iron-deficiency anaemia of late infancy (H. W. Fullerton), 91
 Iron in childhood, studies on the retention of (J. H. Hutchison), 305
 Iron, observations on the retention of (J. H. Hutchison), 265
 IRVINE, E. D. (and J. B. Tilley): Congenital absence of pectoral muscles, 123

J

- Jaundice in neonatal (umbilical) sepsis with jaundice, nuclear (A. Biemond and S. Van Creveld), 173

K

- KEITH, J. D.: Variations in the first heart sound and the auriculo-ventricular conduction time in children with rheumatic fever, 217
 KELLETT, C. E.: Acute myeloid leukaemia in one of identical twins, 239
 Klippel-Feil syndrome, a case of (J. Thomson), 127
 KUGELMASS, I. N.: Milk curd—its mechanism and modification, 25

L

- Leukaemia in one of identical twins, acute myeloid (C. E. Kellett), 239
 Lipoid granulomatosis, angiomas clinically resembling a (J. H. Ebbs), 265
 Liver following icterus gravis neonatorum, atrophic cirrhosis of the (Frances Braid and J. H. Ebbs), 389
 Lungs in an infant, abnormal expansion of the (B. Morgan), 67

M

- Measles with special reference to the determination of the incubation period and the possibility of latent immunity, the illness of infection of (R. E. Smith), 265
 Meningitis, three cases of non-bacterial (J. A. Cardno), 185
 Meningitis with recovery, two cases of influenzal (P. Williams and K. H. Tallerman), 263
 Microphthalmos, orbital cyst and polydactyly, persistent truncus arteriosus communis with (H. A. Harris and G. C. Thomson), 45
 Miliary tuberculosis in children, chronic (R. H. Fish), 1
 Milk curd—its mechanism and modification (I. N. Kugelmass), 25
 Milk for habitual vomiting in infancy, condensed (H. L. Wallace), 262
 Milk, the effect of boiling on the nutritive value of (S. Graham and N. Morris), 169
 MONCRIEFF, A. (and L. E. H. Whitby): Purpura in the new-born, 263
 MORGAN, B.: Abnormal expansion of the lungs in an infant, 67
 MORRIS, N. (and Mary M. Stevenson, Olive D. Peden, Jean M. D. Small): The significance of plasma phosphatase in the diagnosis and prognosis of rickets, 45—(and S. Graham): The effect of boiling on the nutritive value of milk, 169
 Muscles, congenital absence of the pectoral (E. D. Irvine and J. B. Tilley), 123
 Myeloid leukaemia in one of identical twins, acute (C. E. Kellett), 239

N

- NAISH, A. E.: New treatment of haemophilia, 264
 Neonatal (umbilical) sepsis with jaundice, nuclear jaundice in (A. Biemond and S. Van Creveld), 173
 Nervous system in children, tumours of the sympathetic (R. O. Stern and G. H. Newns), 267
 New-born, purpura in the (A. Moncrieff and L. E. H. Whitby), 263
 New treatment of haemophilia (A. E. Naish), 264
 Newly-born, spontaneous pneumothorax of the (P. E. Rothman), 119
 NEWNS, G. H. (and R. O. Stern): Tumours of the sympathetic nervous system in children, 267
 Non-bacterial meningitis, three cases of (J. A. Cardno), 185
 Nuclear jaundice in neonatal (umbilical) sepsis with jaundice (A. Biemond and S. Van Creveld), 173
 Nutritive food requirements (E. Gorter), 261
 Nutritive value of milk, the effect of boiling on the (S. Graham and N. Morris), 169

O

- Obliteration of the bile ducts in a child who lived for three years and three months, congenital (Constance Finlayson), 153
 Orbital cyst and polydactyly, persistent truncus arteriosus communis with microphthalmos (H. A. Harris and G. C. Thomson), 59

P

- PAEDIATRIC ASSOCIATION, BRITISH: Annual General Meeting, 261—Nutritive food requirements, 261—The treatment of infantile pyloric stenosis by eumydrine, 262—Condensed milk for habitual vomiting in infancy, 262—Von Gierke's disease in several members of one family, 263—Purpura in the new-born, 263—Two cases of influenzal meningitis with recovery, 263—Diploma of Child Health, 264—New treatment of haemophilia, 264—Erythema marginatum (rheumaticum), 264—Observation on the retention of iron, 265—A clinical survey of 178 cases of pink disease, 265—Angiomatosis clinically resembling a lipoid granulomatosis, 265—The illness of infection of measles with special reference to the determination of the incubation period and the possibility of latent immunity, 265—Chronic polyarthritis in children, 266—Conduction time and the first heart sound in acute rheumatism, 266
 Papilloma of the choroid plexus in an infant (J. H. Ebbs), 403
 PARSONS, L. G. (and Evelyn M. Hickmans, Ethel Finch): Studies in anaemia of infancy and childhood, Part XI, 369
 Pectoral muscles, congenital absence of the (E. D. Irvine and J. B. Tilley), 123
 PEDEN, OLIVE D.: Plasma phosphatase and phosphorus during the healing of fractures in children, 87—(and N. Morris, Mary M. Stevenson, Jean M. D. Small): The significance of plasma phosphatase in the diagnosis and prognosis of rickets, 43
 Pellagra in African children (H. C. Trowell), 193
 PERRY, C. B.: Erythema marginatum (rheumaticum), 233
 Phosphatase and phosphorus during the healing of fractures in children, plasma (Olive D. Peden), 87
 Phosphatase in the diagnosis and prognosis of rickets, the significance of plasma (N. Morris, Mary M. Stevenson, Olive D. Peden and Jean M. D. Small), 45
 Phosphorus during the healing of fractures in children, plasma phosphatase and (Olive D. Peden), 87
 Pink disease, a clinical survey of 178 cases of (J. C. Spence), 265
 Plasma phosphatase and phosphorus during the healing of fractures in children (Olive D. Peden), 87
 Plasma phosphatase in the diagnosis and prognosis of rickets, significance of (N. Morris, Mary M. Stevenson, Olive D. Peden and Jean M. D. Small), 45
 Pneumothorax of the newly-born, spontaneous (P. E. Rothman), 119
 Polydactyly, persistent truncus arteriosus communis with microphthalmos, orbital cyst and (H. A. Harris and G. C. Thomson), 59
 Pre-school children, an investigation into the health of (P. Henderson), 157
 PRICE, M. R.: Vitamin B₁ deficiency in infancy, a critical review, 213
 Primary tuberculosis of the skin (O. S. Rougichitch), 189
 Prognosis in rheumatoid arthritis in childhood (T. Colver), 253
 Pulmonary tuberculosis of childhood, the demonstration of the tubercle bacillus in the (S. Campbell), 321
 Purpura in the new-born (A. Moncrieff and L. E. H. Whitby), 263
 Pyloric stenosis by eumydrine, the treatment of infantile (J. V. C. Breithwaite), 262
 Pyloric stenosis without symptoms, hypertrophic (Leonard Findlay), 399

R

- Retention of iron, observations on the (J. H. Hutchison), 265
 Rheumatic fever, variations in the first heart sound and the auriculo-ventricular conduction time in children with (J. D. Keith), 217
 Rheumaticum, erythema marginatum (E. B. Perry), 233
 Rheumatoid arthritis in childhood, the prognosis in (T. Colver), 253
 Rickets, the significance of plasma phosphatase in the diagnosis and prognosis of (N. Morris, Mary M. Stevenson, Olive D. Peden and Jean M. D. Small), 45
 ROTHMAN, P. E.: Spontaneous pneumothorax of the newly-born, 119
 ROUGICHITCH, O. A.: Primary tuberculosis of the skin, 189
 RUSSELL, DOROTHY S. (and K. H. Tallerman): Familial progressive diffuse cerebral sclerosis of infants, 71

S

- SABRI, I. A. (and M. A. Abboud, M. Ali): Dysentery in infancy, 225

Sclerosis, familial progressive diffuse cerebral, of infants (Dorothy S. Russell and K. H. Tallerman), 71

Sepsis with jaundice, nuclear jaundice in neonatal (umbilical) (A. Biemond and S. Van Creveld), 173

Sinus thrombosis in children, cerebral (J. H. Ebbs), 133

Skin, primary tuberculosis of the (O. S. Rougitchitch), 189

SMALL, JEAN M. D. (and N. Morris, Mary M. Stevenson, Olive D. Peden) : The significance of plasma phosphatase in the diagnosis and prognosis of rickets, 45

SMITH, R. E. : The illness of infection of measles, with special reference to the determination of the incubation period and the possibility of latent immunity, 265

SPENCE, J. C. : A clinical survey of 178 cases of pink disease, 265

Spontaneous pneumothorax of the newly-born (P. E. Rothman), 119

Stenosis, by cumydrine, the treatment of infantile pyloric (J. V. C. Braithwaite), 262

STERN, R. O. (and G. H. Newns) : Tumours of the sympathetic nervous system in children, 267

—Cerebral tumours in children, 291

STEVENSON, MARY M. (and N. Morris, Olive D. Peden, Jean M. D. Small) : The significance of plasma phosphatase in the diagnosis and prognosis of rickets, 45

Studies in anaemia of infancy and childhood, Part XI (L. G. Parsons, Evelyn M. Hickmans and Ethel Finch), 369

Studies in gastro-enteritis (E. D. Cooper), 339

Studies on the retention of iron in childhood (J. H. Hutchison), 305

Sympathetic nervous system in children, tumours of the (R. O. Stern and G. H. Newns), 267

T

TALLERMAN, K. H. (and Dorothy S. Russell) : Familial progressive diffuse cerebral sclerosis of infants, 71—(and P. Williams) : Two cases of influenzal meningitis with recovery, 263

THOMSON, G. C. (and H. A. Harris) : Persistent truncus arteriosus communis with microphthalmos, orbital cyst and polydactyly, 59

THOMSON, J. : A case of the Klippel-Feil syndrome, 127

Thrombosis in children, cerebral sinus (J. H. Ebbs), 133

TILLEY, J. B. (and E. D. Irvine) : Congenital absence of pectoral muscles, 123

Treatment of haemophilia, new (A. E. Naish), 264

Treatment of infantile pyloric stenosis by cumydrine, (J. V. C. Braithwaite), 262

TROWELL, H. C. : Pellagra in African children, 193

Truncus arteriosus communis with microphthalmos, orbital cyst and polydactyly, persistent (H. A. Harris and G. C. Thomson), 59

Tubercle bacillus in the pulmonary tuberculosis of childhood, the demonstration of (S. Campbell), 321

Tuberculosis in children, chronic miliary (R. H. Fish), 1

Tuberculosis of childhood, the demonstration of the tubercle bacillus in the pulmonary (S. Campbell), 321

Tuberculosis of the skin, primary (O. S. Rougitchitch), 189

Tumours in children, cerebral (R. O. Stern), 291

Tumours of the sympathetic nervous system in children (R. O. Stern and G. H. Newns), 267

Twins, acute myeloid leukaemia in one of identical (C. E. Kellett), 239

U

Umbilical sepsis with jaundice, nuclear jaundice in neonatal (A. Biemond and S. Van Creveld), 173

V

Vaccinia, generalized cutaneous (P. R. Evans), 333

Variations in the first heart sound and the auriculo-ventricular conduction time in children with rheumatic fever (J. D. Keith), 217

Vitamin B₁ deficiency in infancy (M. R. Price), 213

Vomiting in infancy, condensed milk for habitual (H. L. Wallace), 262

von Gierke's disease in several members of one family (F. J. Ford), 263

W

WALLACE, H. L. : Condensed milk for habitual vomiting in infancy, 262

WHITBY, L. E. H. (and A. Moncrieff) : Purpura in the new-born, 263

WILLIAMS, P. (and K. H. Tallerman) : Two cases of influenzal meningitis with recovery, 263
